Comparative analysis of the collisional deactivation of $O_2(^1\Delta_g)$, $O_2(^1\Sigma_g^+)$, $SO(^1\Sigma^+)$, $SeO(^1\Sigma^+)$ and $NF(^1\Sigma^+)$ by small polyatomic molecules 1
R. Schmidt (Frankfurt/Main, Germany)

Investigation of carbazole derivatives and their van der Waals complexes in the jet by laser-induced fluorescence spectroscopy 7
H. Yu, S.M. Zain, I.V. Eigenbrot and D. Phillips (London, UK)

Cl (^2P_j) fine structure quantum yields from UV dissociation of PCl_3, CCl_4, $CHCl_3$ and Cl_2 in a supersonic jet 17
S. Deshmukh and W.P. Hess (Richland, WA, USA)

Photodissociation from an in-plane rotation in water as a direct probe of dynamics 23
D. David, I. Bar and S. Rosenwaks (Beer-Sheva, Israel)

Photon-induced unimolecular decay of the benzyl radical: first direct identification of the reaction pathway to C_7H_6 33
R. Fröchtenicht, H. Hippler, J. Troe and J.P. Toennies (Göttingen, Germany)

Photophysics of chlorofluorobenzenes: enhancement of sensitized phosphorescence due to cluster formation 39
Y. Numata, M. Watahiki, H. Toriyama and I. Suzuka (Koriyama, Japan)

Vector and scalar correlations in the photodissociation of NCCN 45
M. Wu and G.E. Hall (Upton, NY, USA)

Application of fractals and kinetic equations to cluster formation 53
J. Chaiken and J. Goodisman (Syracuse, NY, USA)

Resonance-enhanced multiphoton ionization (REMPI) spectroscopy of photolytically generated hot CF radicals 61
M. Roßberg, W. Strube, J. Wollbrandt and E. Linke (Berlin, Germany)

Molecular beam measurements of small specific rate constants for unimolecular reactions. 67
R. Fröchtenicht and J.P. Toennies (Göttingen, Germany)

Photodissociation of state-selected cluster ions studied by mass-selective, pulsed-field threshold ionization spectroscopy 73
H. Krause and H.J. Neusser (Garching, Germany)

Kinetic studies of NH_x radical reactions 85
M. Wolf, D.L. Yang and J.L. Durant (Livermore, CA, USA)

Conformation dependence of electron transfer in jet-cooled anthracene complexes with aniline derivatives 95
F. Piuzzi, V. Brenner, P. Millié (Gif-sur-Yvette, France) and A. Tramer (Orsay, France)

A mechanistic study of photodecomposition of acenaphthylene on a dry silica surface 103
J.T. Barbas, R. Dabestani and M.E. Sigman (Oak Ridge, TN, USA)

Hydrogen bonding of aromatic amines in hydroxylic solvents
2. Absorption and emission spectroscopy of substituted 7-aminocoumarins and 7-aminocarbostyrils 113
R. Nakagaki, N. Kitamura, I. Aoyama and H. Ohtsubo (Ishikawa, Japan)

Photochemistry of planar E-hexatrienes: an AM1 study 121
P. Hinrich, J.A. van der Hart and H.J.C. Jacobs (Leiden, The Netherlands)

Dual fluorescence of 4-*N*,*N*-dimethylaminopyridine. Role of hydrogen-bonded complex in the ground state 125
C. Cazeau-Dubroca, G. Nouchi, M. Ben Brahim, M. Pesquer, D. Gorse and Ph. Cazeau (Talence, France)

Comparative theoretical study of intramolecular proton transfer in the photochemical cycles of 2-(2′-hydroxyphenyl)benzoxazole and 5,8-dimethyl-1-tetralone 135
Z. Smedarchina and V. Enchev (Sofia, Bulgaria)

Photophysics and photochemical dynamics of chlorotoluene molecules 145
T. Ichimura, A. Kawana, T. Suzuki (Tokyo, Japan), T. Ebata and N. Mikami (Sendai, Japan)

Solvatochromic shifts of naphthalene and pyrene excimers 151
E.M.S. Castanheira and J.M.G. Martinho (Lisbon, Portugal)

Mechanisms of fluorescence quenching by hydrogen bonding in various aza aromatics 157
J. Herbich, J. Waluk (Warsaw, Poland), R.P. Thummel and C.-Y. Hung (Houston, TX, USA)

Elsevier Sequoia

Photophysics and photochemistry of tetraanthraporphyrazines; attempts to obtain a new generation of photosensitizers 161
W. Freyer, H. Stiel, K. Teuchner and D. Leupold (Berlin, Germany)

Femtosecond intermolecular electron transfer in condensed systems 169
K. Yoshihara, Y. Nagasawa, A. Yartsev, S. Kumazaki, H. Kandori, A.E. Johnson and K. Tominaga (Okazaki, Japan)

Excimer kinetics in di(naphthyl)propane 177
T.A. Smith, D.A. Shipp, G.D. Scholes and K.P. Ghiggino (Parkville, Vic., Australia)

Two-photon chemistry in the laser jet: generation of radical intermediates and their photochemical transformations 187
W. Adam, F. Kita and R.S. Oestrich (Würzburg, Germany)

Photochemistry of dibenzo-1,4-dioxins: intramolecular rearrangement-reduction through observable 2,2′-biphenyl-quinones 199
B. Guan and P. Wan (Victoria, B.C., Canada)

Proton transfer in excited electronic states: environmental effects on the tautomerization of 2-pyridone 211
V. Barone (Naples, Italy) and C. Adamo (Potenza, Italy)

Substituent effect on photochromism of indolinospirooxazines. 221
X.Y. Zhang, S. Jin, Y.F. Ming, Y.C. Liang, L.H. Yu, M.G. Fan (Beijing, China), J. Luo, Z.H. Zuo and S.D. Yao (Shanghai, China)

Photosolvolysis of 2-aminobenzyl alcohol in aqueous solution 227
C. Yang and P. Wan (Victoria, B.C., Canada)

Intramolecular photocycloaddition reactions of 4-phenoxybut-1-enes. 233
D. De Keukeleire, S.-L. He (Ghent, Belgium), D. Blakemore and A. Gilbert (Reading, UK)

Photoinduced electron transfer variables: rigidity or orientation?. 241
D.G. Seapy, S.S.H. Al-Mahmoodi, N.M.M. Al-Belushi and F.A.M. Al-Mjeni (Muscat, Oman)

Mechanistic investigations and spectrokinetic parameter determination during thermoreversible photochromism with degradation: example of application to the triphenylimidazolyl dimer (TPID) system 251
G.P. Misra, D. Lavabre and J.C. Micheau (Toulouse, France)

Photochemical reactions of gadolinium(III) tetraphenylporphyrin in toluene solution containing an electron acceptor or donor 257
S. Radzki (Lublin, Poland) and C. Giannotti (Gif-sur-Yvette, France)

Photo-oxidation of metal carbynes 265
L. McElwee-White, K.B. Kingsbury and J.D. Carter (Stanford, CA, USA)

Photoredox behaviour of *trans* and *cis* Co(III)-diisothiocyanatotetram(m)ine complexes 271
L.-Z. Cai (Victoria, B.C., Canada), D.A. House (Christchurch, New Zealand), D.M. Kneeland (Austin, TX, USA) and A.D. Kirk (Victoria, B.C., Canada)

Oxygen quenching of tris(2,2′-bipyridine) ruthenium(II) complexes in thin organic films 283
H. Neil McMurray, P. Douglas, C. Busa and M.S. Garley (Swansea, UK)

Two-photon excitation of alkyl-substituted magnesium phthalocyanine: radical formation via higher excited states 289
H. Stiel, K. Teuchner, A. Paul, W. Freyer and D. Leupold (Berlin, Germany)

Persulphate quenching of the excited state of ruthenium(II) tris-bipyridyl dication: thermal reactions 299
K. Henbest, P. Douglas, M.S. Garley and A. Mills (Swansea, UK)

Temperature-induced structural and permeability changes in dioctadecyldimethylammonium bromide (DODAB) vesicles: a fluorescence investigation using 2-[(*p*-methylamino)phenyl]-3,3-dimethyl-5-carboethoxy-3H-indole as a probe. 307
R.S. Sarpal and G. Durocher (Montréal, Que., Canada)

Photochemical properties of mixed-metal supramolecular complexes. 315
S.M. Molnar, G.E. Jensen, L.M. Vogler, S.W. Jones, L. Laverman, J.S. Bridgewater, M.M. Richter and K.J. Brewer (Blacksburg, VA, USA)

Electron and singlet energy transfer in rigid supramolecular systems 323
A.H.A. Clayton, K.P. Ghiggino (Parkville, Vic., Australia), J.M. Lawson and M.N. Paddon-Row (Kensington, N.S.W., Australia)

A study on the photophysical properties of anthracene in zeolite 333
J. Park (Seoul, South Korea), W.-K. Kang, R. Ryoo, K.-H. Jung (Taejon, South Korea) and D.-J. Jang (Seoul, South Korea)

Supramolecular assemblies for light-induced electron-transfer reactions 341
H. Dürr (Saarbrücken, Germany), S. Bossmann (Karlsruhe, Germany), R. Schwarz, M. Kropf, R. Hayo (Saarbrücken, Germany) and N.J. Turro (New York, NY, USA)

Pathways of spontaneous and photoinduced hydrogen tunnelling in organic crystals 351
R. Casalegno, S. Astilean, A. Corval and H.P. Trommsdorff (Saint Martin d'Hères, France)

Mechanisms of excitation transfer in multichromophoric systems 355
G.D. Scholes and K.P. Ghiggino (Parkville, Vic., Australia)

Time and temperature dependence of anthracene triplet yields in frozen aqueous micellar solutions: an electron paramagnetic resonance study 363
G. von Bünau, S. Weber and T. Wolff (Siegen, Germany)

Studies of the antenna effect in polymer molecules.
25. Photozymes with rose bengal chromophores 369
M. Nowakowska, E. Sustar and J.E. Guillet (Toronto, Ont., Canada)

Media effects on the kinetics of anthracene photo-oxidation in polymers 377
J.R. Sheats (Palo Alto, CA, USA)

Morphology-dependent stimulated Raman scattering (MDSRS) 381
P.M. Aker and J.-X. Zhang (Pittsburgh, PA, USA)

Fourier transform IR product study of the reaction of CFO radicals with O_2 at 298 K 389
S.I. Ahonkhai (Benin-City, Nigeria), A. Nölle (Oberpfaffenhofen, Germany), P. Behr and H. Heydtmann (Frankfurt am Main, Germany)

Photochemistry of linear and cyclic oligo- and poly(aryleneethenylene)s — applications in materials science 393
H. Meier, H. Kretzschmann and M. Lang (Mainz, Germany)

Atomic force microscopy and solid state photolyses: phase rebuilding 399
G. Kaupp and M. Plagmann (Oldenburg, Germany)

Environmental and laboratory studies of the photodegradation of the pesticide fenarimol 409
M.C.D.A. Mateus, A.M. Silva (Faro, Portugal) and H.D. Burrows (Coimbra, Portugal)

Photodecomposition of several compounds commonly used as sunscreen agents 417
N.M. Roscher, M.K.O. Lindemann, S.B. Kong, C.G. Cho and P. Jiang (Washington, DC, USA)

Synthesis of iron–cobalt ultrafine particles by decomposition of $Fe(CO)_5$–$Co(CO)_3NO$ using a TEA CO_2 laser 423
T. Majima (Saitama, Japan), T. Miyahara (Chiba, Japan), K. Haneda (Miyagi, Japan) and M. Takami (Saitama, Japan)

Development of a new fluorescence decay measurement system using two-dimensional single-photon counting 429
M. Watanabe, M. Koishi, M. Fujiwara (Hamamatsu City, Japan), T. Takeshita and W. Cieslik (Bridgewater, NJ, USA)

Laser-induced orientational change of nematic liquid crystalline molecules mediated by photochromic reactions of surface azobenzenes 433
Y. Kawanishi, Y. Suzuki, M. Sakuragi, H. Kamezaki (Ibaraki, Japan) and K. Ichimura (Yokohama, Japan)

Laser-induced oxidation reactions in supercritical ethane–O_2 mixtures 439
K. Iguchi, Y. Oshima and S. Koda (Tokyo, Japan)

Applications of chemometric methods to spectroscopic studies of aggregate formation and twisted intramolecular charge transfer in the gas phase and in non-polar solvents 445
Y.-P. Sun and C.E. Bunker (Clemson, SC, USA)

Photoinduced optical anisotropy in films of photochromic liquid crystalline polymers 453
Th. Fischer, L. Läsker, J. Stumpe (Berlin, Germany) and S.G. Kostromin (Moscow, Russian Federation)
